Summary

Full Stack Developer specializing in building scalable, high-performance web and mobile applications with a strong focus on accessibility and user-centric design. Experienced in developing production-grade platforms across frontend (React) and backend (Node.js, Laravel), including real-time systems, authentication flows, and API integrations. Proven ability to deliver end-to-end solutions, including Flutter-based mobile applications deployed to production. Leverages AI-assisted development tools to accelerate workflows, optimize performance, and enhance product quality.

HIGHLIGHT PROJECT

Employee Management & Attendance System (Mobile + Web)

Flutter | Laravel (Filament) | React | REST APIs

- Developed and deployed a production-grade employee management system used for daily attendance, task tracking, and time monitoring
- Built a Flutter-based mobile application integrated with a Laravel (Filament) admin dashboard
- Designed role-based workflows enabling managers to assign tasks, set deadlines, and approve employee submissions
- Implemented automated email workflows for task reminders, deadline escalations, and daily EOD reporting
- Engineered attendance tracking system with check-in/out, break monitoring, and real-time time calculations
- Integrated APIs across frontend (React), backend (Laravel/Node.js), and mobile platforms
- Delivered end-to-end ownership from development to Play Store deployment, supporting real-time usage by internal teams
- Actively used by internal teams for daily operations and workflow management

Technical Skills

- **Languages:** JavaScript (ES6+), SQL
- **Frontend:** React.js, Redux Toolkit, HTML5, CSS3, SCSS, Bootstrap, Responsive Design, Accessibility (WCAG)
- **Backend:** Node.js, Express.js, PHP (Laravel, Filament)
- **Mobile Development:** Flutter
- **Database:** MongoDB, SQL Server
- **Core Concepts:** RESTful APIs, Authentication (JWT), State Management, Performance Optimization, Core Web Vitals
- **Tools:** Git, GitHub, VS Code, Postman, Insomnia, Agile/Scrum
- **AI-assisted Development:** ChatGPT, GitHub Copilot, Claude, Figma AI (Prototyping), AI Accessibility Tools

Frontend Developer – Able Aura Technologies

- Built reusable React components (Hooks), reducing code duplication by 30%
- Integrated RESTful APIs and managed JWT-based authentication for secure, real-time data operations
- Optimized performance using code splitting and lazy loading for better load times in low-bandwidth environments
- Developed and deployed a Flutter-based employee management app with Laravel (Filament) backend for attendance, task tracking, and time monitoring
- Designed backend workflows and integrated APIs across React, Laravel/Node.js, and mobile platforms
- Delivered end-to-end features from development to Play Store deployment
- Contributed to Agile sprints (planning, reviews, delivery) and leveraged AI tools to accelerate development and improve code quality

Education

- **Master of Computer Applications (MCA)**
Dr. MGR Educational Research & Institute, Chennai — 2023
- **Bachelor of Commerce (B.Com)**
Sri Venkateshwara University, Tirupati — 2021

Certifications – Responsive Web Design (freeCodeCamp), ReactJS (Simplilearn)

Key Projects

AcademyAbleAura – academy.ableaura.com

| React, HTML, CSS, AI prototyping

- Developed accessibility-first UI for a sports platform serving children with disabilities
- Engineered responsive layouts for listings, onboarding, and galleries.
- Enhanced emotional design and clarity with AI-driven prototyping (Figma plugins).

Able Aura – Digital Ecosystem for Disability Support ableaura.org

| React, JavaScript, CSS

- Built modular UIs for services such as travel, therapy, and housing (Cosmic Homes).
- Improved accessibility using AI accessibility checkers and industry best practices.
- Maximized device responsiveness for web and hybrid Android applications.

MyChildLife – Autism Support Site mychild.thecosmichomes.com

| React, HTML, CSS

- Developed emotionally supportive UI for parents of autistic children.
- Integrated multimedia and optimized user experience clarity.
- Used ChatGPT to draft personalized content and knowledge base resources.

TheCosmicHomes – Villa Project thecosmichomes.com

| React, JavaScript, CSS

- Built frontend form components for autism-friendly villa listings.
- Implemented image-optimized, mobile-friendly layouts.
- Enhanced accessibility using AI-powered evaluation tools.
